Monday August 29th:  
**2016 Malcolm Dole Distinguished Summer Lectures in Physical Chemistry:**  
Mark Johnson, Yale University  
Tech L211  
4:00 – 5:00pm

Tuesday August 30th:  
**2016 Malcolm Dole Distinguished Summer Lectures in Physical Chemistry:**  
Mark Johnson, Yale University  
Tech L211  
4:00-5:00pm

**BIP**

BIP meets every Friday 10-11:00am in Tech K140

**Arrivals**

Xuan Zhang joined the Farha Group  
Stephanie Knezz joined GenChem

**Opportunities**

**Ball State University's Department of Chemistry** is inviting applications for a full-time, tenure-track faculty position in the area of biochemistry, available August 18, 2017.

Major responsibilities:  
Develop an externally-funded research program that complements the department’s existing research, which involves undergraduate and graduate students. Teach 10-15 contact hours (8-12 credit hours) of chemistry courses each academic term, depending on released time for scholarly activity. Teaching assignments will include undergraduate and graduate level courses in biochemistry as well as general chemistry.

Minimum qualifications:  
Ph.D. degree in Chemistry, Biochemistry or closely related area from an accredited college or university at the time of application; postdoctoral research experience or equivalent; evidence of potential for excellence in teaching and in research.

Preferred qualifications: Teaching experience at the collegiate level, e.g. teaching assistant, instructor, Assistant Professor; research interests that focus on an area which enhances the department’s existing research programs.

Send cover letter, vita, copies of undergraduate and graduate transcripts, statement of teaching philosophy, three original letters of recommendation, and description of proposed research to:
Dr. Robert E. Sammelson, Chairperson
at chemoffice2@bsu.edu

Review of applications will begin immediately and will continue until the position is filled.
www.bsu.edu/chemistry

The Department of Chemistry at Washington University in St. Louis seeks to make a faculty appointment in biochemistry to begin in the fall of 2017. The position is at the assistant-professor level. The duties of the position include conducting research, publishing research results in peer-reviewed journals, applying successfully for extramural research grants, teaching assigned courses, including introductory biochemistry, advising students, performing assigned committee work, and participating in appropriate university service. The development and maintenance of an outstanding research program and excellence in the teaching of core chemistry courses at the undergraduate and graduate levels are required. Candidates must have a Ph.D. or equivalent doctoral degree in the field of chemistry, biochemistry, or a closely related field at the time of appointment.

Applications should consist of a curriculum vitae, one or more concise research proposals, and a brief summary of research accomplishments (one-page limit). These documents are to be submitted in electronic form as PDF (portable document format) files to chemsearch@wustl.edu with the following in the subject line: “Biochemistry Position.” Applicants should also arrange for three letters of reference to be sent to chemsearch@wustl.edu, with signed originals sent to:

Chemistry Faculty Search Committee
Department of Chemistry, Washington University
One Brookings Drive, Campus Box 1134
St. Louis, MO 63130-4899
[FAX no. (314) 935-4481]

Completed applications for the position must be received by 01 October 2016 to ensure inclusion in the initial review. However, applications received later will also be considered until the search is concluded.

The Georgia Institute of Technology, School of Chemistry and Biochemistry seeks to fill one or more tenure-track faculty positions. Candidates from all areas will be considered, with opportunities for joint appointments in other departments of science and engineering to facilitate interdisciplinary research and scholarship. Exceptional candidates at all levels are encouraged to apply. Candidates for appointment at the assistant professor level should submit an application letter, curriculum vitae, summary of research plans, description of teaching interests and philosophy, and arrange for submission of three letters of reference. Candidates at advanced levels should submit an application letter, curriculum vitae, and a brief description of research plans (particularly if future plans differ significantly from past efforts). All materials and requests for information should be submitted electronically, as per the instructions found at:

https://academicjobsonline.org/ajo/jobs/7626

The application deadline is October 1, 2016 with application review continuing until the positions are filled. Georgia Tech is an equal education/employment opportunity institution.

The University of Nevada, Reno Department of Chemistry is seeking candidates to fill a tenure-track position at the Assistant Professor Level in Inorganic Materials Chemistry (i.e. Bio(inspired)-materials, polymer research, soft materials, solid state chemistry, etc). In addition to developing an active research program in inorganic chemistry, the successful candidate will also be expected to contribute to the
teaching mission of the University, and therefore must be able to teach undergraduate and graduate courses in the inorganic division. For more information about the department and its programs potential candidates should visit the website at www.unr.edu/chemistry

More information about the position and how to apply can be found at www.unrsearch.com/postings/21505

Application review will begin October 9, 2016.

**The College of Wooster** invites applications for a tenure-track Assistant Professor of Chemistry to begin August 2017. Primary teaching responsibilities include advanced courses and labs in analytical chemistry and instrumental analysis, as well as general chemistry and participation in the College’s First Year Seminar Program. The development of a rigorous undergraduate research program in an area of analytical chemistry, and participation in The College’s Senior Independent Study Thesis Research Program, is expected. The successful applicant will have a Ph.D. by the time of appointment, those with post-doctoral research and teaching experience preferred. Applicants from all fields of analytical chemistry will be considered. Those with expertise in mass spectrometry, environmental chemistry, or other areas that might contribute to the Environmental Studies Program are particularly encouraged to apply. The College of Wooster enrolls a diverse student body (19% domestic students of color and 10% international students); applicants should have experience with diverse student populations.

Submit cover letter, curriculum vitae, unofficial undergraduate and graduate transcripts, statement on contributions to diversity in the classroom and/or curriculum, summary of research plans, and a one-page statement describing interest in teaching and supervising research in an undergraduate liberal arts setting. Three letters of recommendation should also be provided under separate cover. Application materials should be submitted via Interfolio (https://apply.interfolio.com/36479). Questions about the position may be directed to Dr. Paul Edmiston, (pedmiston@wooster.edu). Review of applications begins October 1, 2016, and will continue until an appointment is made.

The College of Wooster is an independent college of the liberal arts and sciences with a commitment to excellence in undergraduate education. The College values diversity, strives to attract qualified women and minority candidates, and encourages individuals belonging to these groups to apply. Wooster seeks to ensure diversity by its policy of employing persons without regard to age, sex, color, race, creed, religion, national origin, disability, veteran status, sexual orientation, gender identity and expression, or political affiliation. The College of Wooster is an Equal Opportunity/Affirmative Action Employer. Employment is subject to federal laws requiring verification of identity and legal right to work in the United States as required by the Immigration Reform and Control Act. Drug-free workplace.

**The Department of Chemistry at Wayne State University** will be holding the 18th Annual Chemistry Graduate Research Symposium on October 22nd, 2016.

The symposium is a unique student organized event of graduate students to present their research to fellow students, faculty and the regional scientific community.

This event also serves to introduce new graduate students to cutting edge research in the department and acquaint prospective graduate students and their faculty advisors from regional institutions with our department.

The deadline for submitting a poster abstract in October 1st and the deadline for registration is October 15th. If you would like additional information, the symposium website can be found at www.chem.wayne.edu/symposium
**Western Washington University (WWU)** invites applications for a tenure-track assistant professor position in analytical chemistry beginning September 15, 2017. The Chemistry Department and the College of Sciences and Engineering are committed to WWU’s strategic goal of recruiting and retaining diverse faculty, and welcome applications from diverse candidates.

**About the College/Department:** WWU is a primarily undergraduate state institution (about 15,000 students) in Bellingham, WA, 60 miles south of Vancouver, British Columbia and 90 miles north of Seattle. The Chemistry Department serves about 300 majors and offers M.S., B.S., and B.A., degrees in Chemistry and Biochemistry, and a combined B.A. with Education degree. The B.S. Chemistry degree is approved by the American Chemical Society. More than half of all undergraduate chemistry majors are active in faculty-mentored research projects. Many of these students present their work regionally and nationally and are co-authors on peer-reviewed publications.

**Position Responsibilities:** The successful candidate will be required to teach quantitative analysis and instrumental analysis as well as general chemistry and appropriate special topics courses. Successful candidates must be committed to quality undergraduate education and will be expected to develop and maintain an active research program involving undergraduate students.

**Required Qualifications:**
An earned Ph.D. in analytical chemistry or closely related field from an accredited institution is required at time of appointment
Record of or potential for high quality undergraduate teaching
Record of high quality scholarship in the chemical sciences
Ability to work effectively with a diverse student body
Commitment to establishing a vigorous research program involving undergraduate students

The focus of an individual's research specialization is open to all relevant areas of analytical chemistry.

**Preferred Qualifications:**
Post-doctoral research experience
Industrial experience in analytical chemistry
Ability to initiate or participate in cross-disciplinary collaborations
Academic Emphasis: Analytical Chemistry

**Job Location:** Western Washington University, Bellingham, WA

Salary: Commensurate with experience and qualifications
Bargaining Union: United Faculty of Western Washington

Application Instructions and Requested Documents:
Interested candidates must apply online via WWU’s Electronic Application System for Employment. To submit your application, please go to: [www.wwu.edu/jobs](http://www.wwu.edu/jobs).

You must attach the following documents:
A cover letter addressing all the of the required and preferred qualifications
A curriculum vitae
Undergraduate and graduate transcripts
A detailed statement of research plans (max. length of four pages, not including references)
A one-page statement of teaching philosophy and interest

In addition, please arrange to have three letters of recommendation electronically submitted to chemistry.search@wwu.edu.
Other Information: Inquiries about the position may be addressed to Prof. Steven Emory at (360) - 650-7437 or steven.emory@wwu.edu.

Closing Date Notes: Application review begins September 15, 2016; position is open until filled

**Postdoctoral positions are available for enzymologists in enzyme and pathway discovery** as part of a new multidisciplinary Program Project (P01GM118303, Novel Strategies for the Discovery of Microbial Metabolic Pathways) that “replaces” the Enzyme Function Initiative (EFI). We are especially interested in applicants with demonstrated expertise in mechanistic enzymology.

Like the EFI, the Program Project will develop sequence/structure-based strategies for facilitating assignment of in vitro enzymatic and in vivo metabolic roles of widely conserved enzymes of unknown function discovered in genome projects, a crucial limitation in microbial genomic biology. These strategies will be directed toward deciphering both the extra- and intracellular metabolomes of the human gut microbiome, using the ligand specificities of transport systems and transcriptional regulators to guide the discovery of novel enzymes and metabolites in novel pathways.

The Program Project integrates bioinformatics, genetics, metabolomics, structural biology, and computation with enzymology. The components of the Program Project are located at the University of Illinois (enzymology and microbiology; J. E. Cronan and J. A. Gerlt), Albert Einstein College of Medicine (structural biology and ligand screening; S. C. Almo), and University of California, San Francisco (modeling, docking, pathway prediction; M. P. Jacobson, A. Sali, and B. K. Shoichet). Due to the collaborative and multidisciplinary environment, the Program Project provides an opportunity to receive training in several areas.

To apply or request details, please send an e-mail to enzymes@igb.illinois.edu

**Stanford ChEM-H is an independent institute at Stanford University**, formed in partnership with the Schools of Medicine, Humanities and Sciences, and Engineering. More information about the institute can be found on https://chemh.stanford.edu/. The Institute is seeking applicants for a tenure-track faculty position at the junior level (Assistant or untenured Associate Professor). Applicants are expected to have earned a Ph.D. or M.D. degree in any discipline of science, engineering or medicine.

We will consider applicants knowledgeable in any frontier area of research at the interface between chemistry, biology, engineering, and medicine. In general, we give higher priority to the overall originality and promise of the candidate's work than to the sub-area of specialization.

The successful candidate will have his/her primary appointment in a department within the School of Medicine, Humanities and Sciences, or Engineering. He/she will be expected to teach and/or perform clinical service within this department in a manner that is consistent with standard practices for tenure-track faculty within that department. The candidate will also be expected to develop a world-class research program in chemical biology. Applicants should be seeking a stimulating interdisciplinary environment in which to pursue teaching and research. We anticipate that the faculty member will develop interactions with faculty not only in his/her home department but also in other departments and Schools at Stanford and at the Stanford Synchrotron Radiation Laboratory.

Applications should be addressed to Professors Justin Du Bois and Chaitan Khosla, Search Committee Co-Chairs, and include a curriculum vitae (including research accomplishments, teaching experience, and publications), a description of future research plans, a teaching statement, and at least three letters of reference. All materials should be submitted online at https://academicjobsonline.org/ajo/jobs/7456. To
The School of Basic Sciences at EPFL invites applications for a tenure track assistant professor of experimental physics of biological systems in the Institute of Physics.

The successful candidate must demonstrate innovative research interests within biophysics, broadly defined as the investigation of the structure, dynamics and function of biological systems, from molecules to organisms. The open position will be embedded in a collaborative environment of both theoretical and experimental research at the interface between physical and biological sciences. Unique research platforms are available on campus and elsewhere in Switzerland, including the Swiss Light Source/SwissFEL, the Center for Biological Imaging (CIBM), the Center for Micronanotechnology (CMI) and the Center for Electron Microscopy (CIME). The appointed Professor will also enjoy close contacts with the other EPFL Schools, such as Life Sciences, Engineering, as well as the nearby Universities and University Hospitals.

Candidates must hold a PhD in physics or biophysics and possess a strong experimental background as well as an excellent publication record.

The appointee is expected to initiate an independent, creative research program and be committed to excellence in teaching physics at all levels. We offer internationally competitive salaries, benefits, and start-up resources for scientific equipment, as well as annual resources for PhD students, staff and consumables.

Applications including cover letter with a statement of motivation, curriculum vitae, publications list, concise statements of research and teaching interests as well as the names and addresses (including email) of five references should be submitted in pdf format via the website:

For additional information about this call for applications, please contact:

Prof. Benoit Deveaud
Director of the Institute of Physics
Email: benoit.deveaud@epfl.ch

More information about EPFL and the Institute of Physics can be found at: http://www.epfl.ch/ and http://iphys.epfl.ch

Postdoctoral Positions in Synthetic Inorganic Chemistry Los Alamos National Laboratory (LANL):
Seeking two outstanding candidates with extensive inorganic, organic or organometallic chemistry experience to support emerging/growing programs focused on the fields of actinide chemistry and nuclear security. Candidates will be performing synthetic chemistry to prepare, isolate and characterize novel compounds including those of the transition metals, or the actinides. Study and optimization of metal catalyzed decomposition of organic compounds to generate gas pressure at low
temperatures will also be pursued. Candidates must be willing and able to work with an interdisciplinary team of scientists from multiple organizations including Chemistry, Materials Science, Engineering, Theoretical and Weapons Divisions.

Minimum Job Requirements:
A strong background and extensive hands-on experience in synthetic chemistry. The ability to work creatively and independently. Demonstrated excellence in written and oral communication skills as evidenced by a strong publication and presentation record.

Desired Skills:
Experience with standard wet- and air-sensitive chemistry techniques for molecular synthesis and characterization (chromatography, Schlenk, drybox, chromatography, NMR and optical spectroscopy, etc.) Knowledge of ligand design. Additional experience in structural analysis (XRD) is a plus.
- Demonstrated ability to work independently and with minimum supervision
- Demonstrated ability to plan and organize assignments so that schedules are met on time
- Ability to obtain a DOE “Q” clearance for one of the programs.

Education:
Ph.D. in chemistry within the last five years or soon to be completed is required

Where You Will Work
Located in northern New Mexico, Los Alamos National Laboratory (LANL) is a multidisciplinary research institution engaged in strategic science on behalf of national security. LANL enhances national security by ensuring the safety and reliability of the U.S. nuclear stockpile, developing technologies to reduce threats from weapons of mass destruction, and solving problems related to energy, environment, infrastructure, health, and global security concerns.

Notes to Applicants:
If interested, please send a CV with the names of three references to Jim Boncella at Boncella@lanl.gov For additional technical details, contact Dr. Jim Boncella at Boncella@lanl.gov

Q Clearance:
Applicants selected to proceed with Q Clearance will be subject to a Federal background investigation and must meet eligibility requirements*.
*Eligibility requirements:
To obtain a clearance, an individual must be at least 18 years of age; US citizenship is required except in very limited circumstances. See DOE Order 472.2 for additional information.

Pre-Employment Drug Test:
The Laboratory requires successful applicants to complete a pre-employment drug test and maintains a substance abuse policy that includes random drug testing.
Candidates may be considered for a Director’s Fellowship and outstanding candidates may be considered for the prestigious Marie Curie, Richard P. Feynman, J. Robert Oppenheimer or Frederick Reines Fellowships.

Equal Opportunity:
Los Alamos National Laboratory is an equal opportunity employer and supports a diverse and inclusive workforce. We welcome and encourage applications from the broadest possible range of qualified candidates. The Laboratory is also committed to making our workplace accessible to individuals with disabilities and will provide reasonable accommodations, upon request for individuals to participate in the application and hiring process. To request such an accommodation, please send email to applyhelp@lanl.gov or call 1-505-665-5627.

The Chemistry Department of Johns Hopkins University, Baltimore, Maryland (www.chemistry.jhu.edu) invites applications from outstanding individuals in search of a tenure-track position in the area broadly defined as chemistry at the interface of biology with an anticipated starting date of July 1, 2017.

Applicants at the Assistant and Associate Professor level are preferred but exceptional candidates at the Full Professor level will also be considered. Applicants should submit a curriculum vitae, a statement of teaching interests and philosophy, and a description of research plans through Interfolio (http://apply.interfolio.com/36258). Consideration of applications will begin on October 17, 2016.

Applicants should send requests for recommendation letters from their Interfolio account to their three references. For questions about Interfolio, call (887) 997-8807 or email help@interfolio.com.

Johns Hopkins University is committed to active recruitment of a diverse faculty and student body. The University is an Affirmative Action/Equal Opportunity Employer of women, minorities, protected veterans and individuals with disabilities and encourages applications from these and other protected group members. Consistent with the University’s goals of achieving excellence in all areas, we will assess the comprehensive qualifications of each applicant.

The Department of Chemistry at Johns Hopkins University is made up of internationally recognized faculty involved in all areas of contemporary chemical science, including many interdisciplinary areas interfacing chemistry with the fields of biology, medicine, physics and materials. There are currently ongoing research programs in analytical chemistry, atmospheric chemistry, environmental chemistry, bioorganic chemistry, biophysical chemistry, inorganic chemistry, bioinorganic chemistry, synthetic organic chemistry, organometallic chemistry, physical organic chemistry, physical chemistry, chemical physics, surface chemistry, and theoretical chemistry. Achievements of the faculty in the department are highlighted by the many awards won each year by various faculty members, including prestigious NSF CAREER awards, Dreyfus Teacher-Scholar Awards, Dreyfus New Faculty Awards, Young Investigator Awards from the American Cancer Society, Department of Energy, DuPont and Eli Lilly, fellowships from the Sloan and Guggenheim Foundations, and Arthur C. Cope Scholar Awards.

The Amherst College Department of Chemistry (https://www.amherst.edu/academiclife/departments/chemistry) invites applications for a full-time tenure-track appointment in inorganic chemistry at the rank of assistant professor beginning in July 2017.

Amherst College is one of the most diverse liberal arts colleges in the country. Forty-four percent of our students identify as domestic students of color, and another 10 percent are international, with non-U.S. citizenship; 17 percent are the first members of their families to attend college. Fifty-one percent of our students are women. Amherst is committed to providing financial aid that meets 100 percent of every student’s demonstrated need, and 58 percent of our students receive financial aid. Our expectation is that the successful candidate will excel at teaching and mentoring students who are broadly diverse with regard to race, ethnicity, socioeconomic status, gender, nationality, sexual orientation, and religion. The position requires a Ph.D. in chemistry and calls for teaching general chemistry and advanced inorganic chemistry at the undergraduate level. Opportunities for teaching electives and interdisciplinary courses
are also available. The successful candidate will be expected to establish a vigorous research program in experimental inorganic chemistry in which undergraduates can substantively participate. Applicants with expertise in any sub-discipline of inorganic chemistry—for example, bioinorganic, environmental, materials, or organometallic chemistry—are encouraged to apply.

Applicants should submit electronically to https://apply.interfolio.com/35694 a curriculum vitae; a statement of teaching philosophy, including philosophy of teaching a diverse student body; a detailed description of research plans; and the contact information for three confidential references. Applicants should also arrange for the forwarding of official undergraduate and graduate transcripts to Ms. Catherine Stillerman, Academic Department Coordinator, Department of Chemistry, Amherst College, P.O. Box 5000, Amherst, MA 01002-5000.

Review of applications will begin September 19, 2016, and will continue until the position is filled. Amherst College is an equal opportunity employer and encourages women, persons of color, and persons with disabilities to apply. The college is committed to enriching its educational experience and its culture through the diversity of its faculty, administration, and staff.

The National Research Council of the National Academies sponsors a number of awards for graduate, postdoctoral and senior researchers at participating federal laboratories and affiliated institutions. These awards include generous stipends ranging from $42,000 - $80,000 per year for recent Ph.D. recipients, and higher for additional experience. Graduate entry level stipends begin at $30,000. These awards provide the opportunity for recipients to do independent research in some of the best-equipped and staffed laboratories in the U.S. Research opportunities are open to U.S. citizens, permanent residents, and for some of the laboratories, foreign nationals.

Detailed program information, including online applications, instructions on how to apply and a list of participating laboratories, is available on the NRC Research Associateship Programs Website (see link above).

Questions should be directed to the NRC at 202-334-2760 (phone) or rap@nas.edu. There are four annual review cycles.

Review Cycle: February; Opens December 1; Closes February 1
Review Cycle: May; Opens March 1; Closes May 1
Review Cycle: August; Opens June 1; Closes August 1
Review Cycle: November; Opens September 1; Closes November 1

Applicants should contact prospective Adviser(s) at the lab(s) prior to the application deadline to discuss their research interests and funding opportunities. More detailed information and an online application can be found at www.nationalacademies.org/rap.
